Trust The Water Experts®

Crystal clear, great tasting water at work

the easy way

People everywhere have discovered the healthy benefits of drinking more water. A steady, dependable supply of crystal-clear, great tasting water is a benefit that all your employees and guests will appreciate.

Culligan point-of-use systems offer your business the latest advancements in modern technology to treat your existing water supply. Whether it's for drinking or making great tasting coffee and other beverages, these systems will provide your office with an endless supply of quality hot and cold drinking water, while providing your company a great value!

The Hydration Equation

Your Employees + Water = Healthy Workplace

Hard working people need proper hydration, and eight glasses a day may not be enough. To calculate a starting point of your ideal water intake, divide your weight in half. This will give you the *minimum* number of ounces of water you should be drinking every day!

Body Weight		
180 lb.	150 lb.	130 lb.
Minimum Ounces Needed Daily		
90 oz. <i>11-12 glasses</i>	75 oz. <i>9-11 glasses</i>	65 oz. <i>8-9 glasses</i>

Even more water needed for: active workers, smokers, dieters, active people, people living in high altitudes, hot/cold weather, seniors, pregnant women, nursing mothers, babies and school-age children, prescription drug takers, drinkers of dehydrating beverages.

Water is the Best Choice

Some common office beverages such as soda and coffee actually dehydrate the body. Water is the best choice for staying hydrated because it is the nutrient your body needs the most.

Unwavering Quality

Culligan point-of-use systems utilize superior water technology to reduce taste and odor complaints while addressing a variety of contamination issues. Culligan filters adhere to the strict certifications of both the National Sanitation Foundation and the Accredited National Standards Institute.

These certifications are your assurance that you're getting what you expect from Culligan... great tasting, crystal-clear drinking water.

“Ahhh...Just Right”

A hot cup of tea, warm cup of cocoa, or cold instant drink. It always tastes better with Culligan water. Choose the system that best fits the needs of your office. Either option delivers a great value.

Automatic Supply...No Bottles

Because the system refills automatically, you'll never run out of water! Getting rid of bottles eliminates dust-collecting clutter, saves valuable floor space and no heavy lifting!

Leading Edge Filtration Within the Cooler

Culligan's proven filtration technology improves the quality of your drinking water. Whether your particular water type calls for advanced carbon filtration or state-of-the-art reverse osmosis, Culligan can provide the highest quality water at the touch of a button. Both technologies improve the taste and odor of your drinking water, as well as substantially reduce microscopic impurities and chemical elements that may be found in your drinking water.*

Advanced Carbon Filtration

Reverse Osmosis Filtration

Simplified Billing

Take the guesswork out of ordering and budgeting your company's drinking water. Culligan offers monthly or quarterly payment plans on our point-of-use systems. Fewer invoices to process, along with an endless supply of drinking water at a fixed monthly price, will save you valuable administrative time.

Convenient Cups

Our attractive, disposable cups are perfect for offering your employees and guests a refreshing drink throughout the workday.

Legendary “Hey Culligan Man!” Service Commitment

You can always count on Culligan for professional service and support. To save you time and money, periodic preventive maintenance is performed by a qualified service technician. We even provide a 30-day satisfaction guarantee to make sure you are happy.
